

Year 2 Summer 1 Weather Patterns in the United Kingdom

# Wonderful Weather

weather

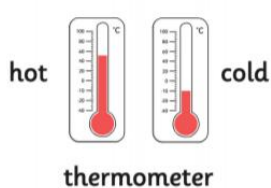

seasons

weather forecast

temperature

North Pole  
The Arctic

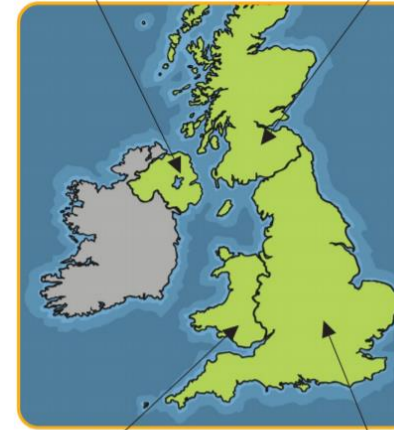

The Equator

South Pole  
The Antarctic

Northern Ireland

Scotland

Wales

England

National Curriculum Link:

-Children should be able to identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the world in relation to the Equator and the North and South Poles

December  
 January **winter**  
 February

June  
 July **summer**  
 August

March  
 April **spring**  
 May

September  
 October **autumn**  
 November

A **weather vane** shows the wind direction.

A **thermometer** shows the temperature.

A **rain gauge** shows how much it has rained.

A **barometer** measures the air pressure.

A climate is the usual weather in an area. Countries around the world have **different** climates.

Countries near the **equator** have **hotter** climates and places like the Arctic have much **colder** climates.

Climates can affect which **plants** grow and which animals live there.
